

Prématornelle L'Escale Preschool

[Register now for the 2016 Preschool Program](#)

Prématornelle L'Escale Preschool provides an immersion program for 30 month to 5 year old children. The preschool program offers opportunity for enrichment where the children are exposed to introductory level *French*, through music, arts, science and play.

The children have many opportunities to play alone or with peers as well as with the educator. A variety of toys, puzzles, games and equipment is made available to the children to choose from, as well as theme centres which are rotated on a regular basis to create new experiences and add motivation.

The educator plays an active role in supervising as well as initiating play with the children through communication and guidance while respecting and responding to the child's lead. The educator will facilitate play by offering ideas and modelling appropriate play with most activities being guided in French and English.

[Program hours](#)
